

24 July 2017

To Whom it May Concern:

It is my pleasure to recommend Lim Yang Zheng for admission to MASTER OF SCIENCE (ELECTRICAL ENGINEERING) - Computer Engineering at National University of Singapore.

I am leading global Behaviours and Features Software team in Dyson. I came to know Yang Zheng when he applied Dyson job opening in 2015. As Southeast Asia Software Manager, I interviewed him and found him quite capable in software as a young graduate.

Not very long after Yang Zheng joined Dyson, our wireless software domain owner was switched to another team, Yang Zheng quickly picked up the role as new wireless software domain owner in Southeast Asia, and was globally acknowledge by different senior stakeholders.

Yang Zheng also worked with another young engineer to prepare an impressive machine learning demo for our new Singapore Technical Centre (STC) opening, it is such a successful demo, most of the main stream media and Internet media reported it and used their demo as the headline picture for Dyson STC launching.

Overall, Yang Zheng is highly intelligent and has good software skills. I would therefore highly recommend him to your program.

If I can be of any further assistance, or provide you with any further information, please do not hesitate to contact with me.

Yours sincerely,

Li Rui  
Global Software Manager for Behaviours and Features  
Dyson Operations Pte Ltd
